

Bailey ST

List Price: CAD\$899.00

Rock Solid Frame

Our innovative "T-bar" tubular girder is welded to the legs midway down the frame. This provides **unprecedented stability** to the wheel and eliminates flex during the "push" forces of the centering process. The T-bar also steadies the frame when extension legs are used. By building in the T-bar, the cost of adding extension legs is greatly reduced.

Largest Removable Splash/Trim Pan

Keep your studio clean with the Bailey **2-piece removable splash/trim pan**. It holds more trims and slops than any other brand and it's sturdier. We can say for a fact that it is absolute the easiest pan to slide in an out. Teachers appreciate how the large Bailey Pan **keeps their classroom clean!**

Great Compact Design

The Bailey ST is a compact wheel with outstanding value. Like all Bailey wheels, the ST is quiet and smooth. It offers the unique Bailey 2-piece removable splash/trim pan. No other wheel in it's class holds as many trims and slops, is sturdier, or easier to slide in an out. Unlike other economy wheels that have flimsy frames and light weight construction, the Bailey ST has the same rock solid "T-Bar" tubular braced frame as our professional wheels for stability. The Bailey ST is designed to receive our inexpensive leg extensions that provide the perfect throwing height so you throw with correct posture.

The counter of the ST is a 3/4" thick white melamine surface. Every wheel has a reversing plug and comes with a reinforced 12" wheel aluminum head. The ST has a 1" drive shaft with commercial grade ball bearings and uses the same motor and controller as found on our ST-X wheel. The ST uses 3 drive belts instead of 4 (as on our other ST and PRO models), but it is still capable of centering up to 50 lb. of clay with a "less aggressive" centering approach. The ST is compact (21" high x 22.5" wide x 25.5" long). Shipping weight: 68 lbs. Some assembly required.

**10 year warranty on our
super bearing.
5 year warranty on our
motors, belts, and electronics.**

Customers rave about the fact that Bailey wheels are **super quiet** and **deliver impressive power** over the full range of speeds. This is because of our superior drive system. Our industrial grade DC motors are powerful and will provide indefinite **trouble-free service**. Our custom bearings are built to last several lifetimes!
